About IndirectTek

IndirectTek LLC is a certified Service-Disabled Veteran-Owned Small Business (SDVOSB) delivering AI governance software and professional services purpose-built for government environments. We build tools and frameworks that enable government software teams to adopt AI-assisted development safely, responsibly, and in compliance with federal requirements — including in classified, air-gapped, and disconnected environments where commercial tools cannot operate.

Headquartered in Fuquay-Varina, North Carolina. Founded and led by a TS/SCI-cleared practitioner with an M.S. in Cybersecurity (Ethical Hacking & Penetration Testing), AWS Solutions Architect Professional, three Google Cloud Professional certifications, CKA, and CISSP.

Elixium — AI Governance and Development Platform

Elixium is the AI governance and development platform that enables government software teams to adopt AI-assisted workflows safely in classified, air-gapped, and compliance-driven environments. It brings AI-powered sprint planning, risk detection, standup automation, backlog management, and full immutable audit trails to the environments where government development teams actually work — including SIPRNet, JWICS, SCIFs, and physically isolated networks.

Key Capabilities

- AI-assisted sprint planning, risk detection, standup report generation, and backlog management
- Full immutable audit trail for all user actions and AI-generated outputs with model version and timestamp attribution
- Human-in-the-loop approval workflows — AI advises, humans decide
- IDE-first workflow via VS Code MCP agent — developers manage sprints without leaving their editor
- Shadow AI governance — all AI usage logged, attributed, and auditable
- Zero vendor cloud dependency in self-hosted and air-gapped modes
- FIPS 140-2 compliant cryptographic modules on self-hosted and air-gapped deployments

Deployment Modes

- Cloud (GCP): Hosted by IndirectTek on Google Cloud Platform in U.S.-based data centers. FedRAMP roadmap: 12 months from contract award. IL2 workloads.
- Self-Hosted: Deployed on customer-managed infrastructure (AWS GovCloud, Azure Government, GCP, or on-premise). FIPS 140-2 enabled. Customer ATO supported. IL4/IL5.
- Air-Gapped: Deployed on physically disconnected networks with no internet connectivity. AI inference runs on locally deployed models delivered via approved physical media. No data leaves the customer environment. IL5, TS/SCI, SAP environments.

Compliance Posture

- FIPS 140-2 enabled (self-hosted and air-gapped)
- IL4/IL5 architecture — customer ATO supported today
- FedRAMP roadmap: Ready within 12 months of contract award
- SOC 2 Type II audit target: Q4 2026
- CMMC Level 2 aligned (NIST SP 800-171)
- FAR 52.227-19 and DFARS 227.7202 commercial software clauses

Pricing

- Elixium Team (Cloud): \$313.20 per user per year — minimum 10 users
- Elixium Business (Cloud): \$529.20 per user per year — minimum 10 users
- Elixium Self-Hosted + Air-Gap: \$853.20 per user per year — minimum 10 users

Government pricing reflects 10% discount off published list price. Volume discounts available at 50+ and 200+ seat tiers. Contact bradleyr@indirecttek.com for enterprise pricing.

Professional Services

IndirectTek delivers the implementation, configuration, and transformation services that make Elixium successful inside government organizations. All engagements are led by TS/SCI-cleared practitioners. Travel and expenses are included in all fixed-price packages.

Structured Pilot — SVC-PILOT — \$8,500

One team, one sprint, two weeks. Up to 15 users. Includes remote installation, configuration, defined success criteria, and a written summary report. Designed as a low-barrier entry point for agencies evaluating Elixium before full deployment. Credit applied toward Standard Implementation or Enterprise Enablement if the agency proceeds within 90 days.

Quick Start — SVC-QS — \$15,000

Remote installation, platform configuration, and two-hour team training. One senior engineer, approximately one week. Travel included. Best for small agencies and early adopters.

Standard Implementation — SVC-STD — \$45,000

Full platform installation, integrations, baseline configuration, and two-day team training. Two senior engineers, two to three weeks. Travel included. Suitable for mid-size agency deployments.

Enterprise Enablement — SVC-ENT — \$120,000

Full implementation plus four-week embedded XP agile coaching and team transformation. Two senior engineers, six to eight weeks. Travel included. For software factories, program offices, and organizations adopting AI-native development at scale.

Air-Gapped Deployment — SVC-AIRGAP — \$100,000+

On-site installation in SCIF or physically disconnected environment. TS/SCI-cleared senior engineer. Local AI model setup, full configuration, and team training. Two weeks on-site minimum. Travel included. Final scope depends on facility requirements, classification level, and number of environments.

Time and Materials Rates

- Principal Architect (Bradley Reid — TS/SCI, CISSP, AWS SA Pro, 3× GCP Pro, CKA, M.S. Cybersecurity): \$350/hr
- Partner & AI Engineer (Paul Beccio — 19+ years federal IT, DHS USCIS platform lead, VMware DoD/Air Force): \$275/hr

T&M engagements require a signed SOW and 40-hour minimum. Travel billed at cost plus 15% administrative fee.

Contract Vehicles

Elixium and IndirectTek professional services are available through Carahsoft Technology Corp. on the following contract vehicles:

- GSA Multiple Award Schedule (MAS) — Contract No. 47QSWA18D008F
- NASA SEWP V
- Army ITES-SW2 — Contract No. W52P1J-20-D-0042
- CoreTrust — 24COR-018GR
- Texas DIR
- Oklahoma OMES — SW1041
- Canadian Public Sector

IndirectTek LLC is a certified SDVOSB effective May 12, 2026 (renewal May 11, 2029). IndirectTek is eligible for SDVOSB set-aside contracts at VA, DoD, and across federal civilian agencies. VETS 2 and additional set-aside contract vehicles are being activated.
